

GB Tech, Inc. acquires National Project Management Division of Eagle Broadband to supplement current customers and increase national commercial footprint

Houston, TX – 5/19/08 – Houston based GB Tech, Inc. announced today that it has purchased the National Project Management (NPM) division of Eagle Broadband, Inc. In this asset-only purchase, GB Tech has acquired the customer base, national 3000+ Affiliate subcontractor base, key employees, marketing portfolio, and job tracking databases of NPM.

“This important acquisition represents another milestone in the development of our company.” commented Gale Burkett, President and CEO of GB Tech, Inc. “This new National Project Management Division, part of our Enterprise Business Group, will both supplement our existing aerospace customer base and also bring to us new and important national commercial customers.”

Project Management installation, site survey, and trouble call services for existing national customers will remain uninterrupted during the transition to GB Tech’s offices in Houston, TX, adjacent to the Johnson Space Center. The transition of employees and equipment is expected to start on May 19, 2008.

“We are very excited and proud that our division is moving to GB Tech.” said Kane Brushwood, who will retain his post as the manager of the division as Director, Project Operations. “We look forward to working with a company of the integrity, stature, respect that GB Tech has in the business community.”
